## BULL ARM UPDATE

Hebron Project Issue 14 - Quarter 4 - 2016

### Back to School Fundraiser

The Hebron Project's annual Bull Arm back to school cash drive raised \$3700 thanks to generous donations by workers at Bull Arm. The funds were donated to Clarendville High School and will help cover the cost of school supplies, field trips and extracurricular activities for students who may be challenged financially this school year.

The Hebron owners also donated \$3000 for back to school assistance to students at Clarendville Middle School.

The Hebron Project would like to wish all students a safe, enjoyable and productive year of learning!

*(L-R) Dan Thompson, ExxonMobil's GBS Site Construction Manager presenting donation to Ian Davidson, Principal of Clarendville High School*

The living quarters loaded on barge (right, on jacking tower) being transported prior to installation on utilities process module (left).

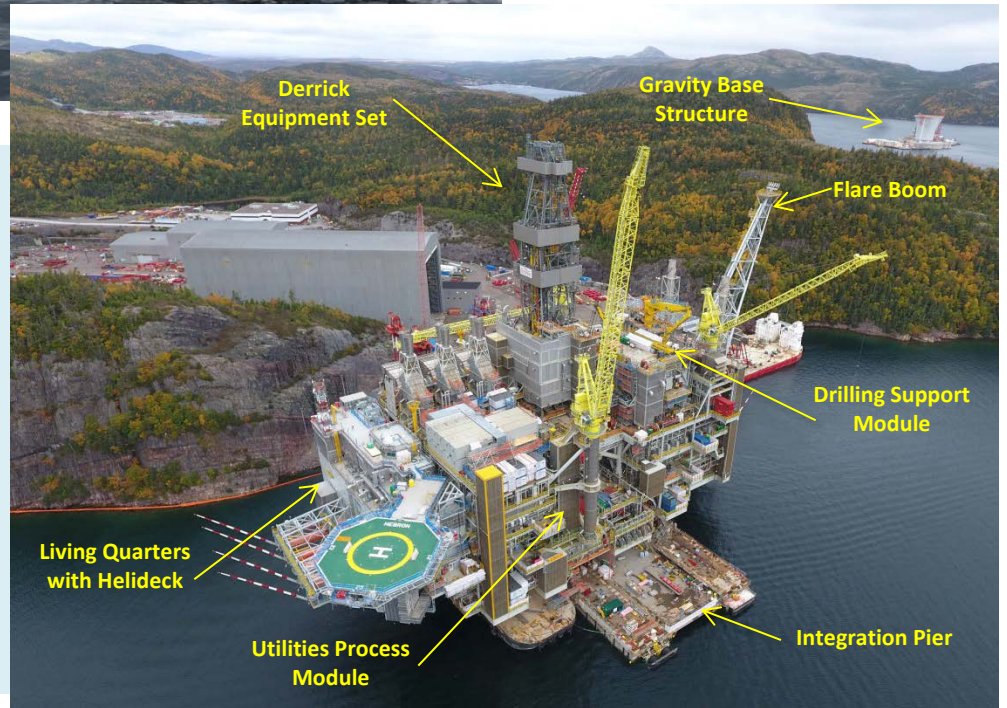

The living quarters will provide accommodations for 220 people offshore.

All Topsides modules were successfully installed in October 2016.

The integrated Topsides modules sit on the Bull Arm integration pier.

The living quarters and helideck are located on the left side of the Topsides. The derrick equipment set and drilling support module are visible in the centre, and the flare boom is located on the right.

The gravity base structure (upper right corner of photo) located at the deepwater site is preparing for submergence testing.

### Contact Us

The Hebron Information Centre is located at the TCH entrance to the Bull Arm Site (Nalcor Building). Community Relations staff are generally available Monday-Friday during regular business hours.
